Assessment

Encounter Date	Assessment Date	Assessment	LastModified by	Organization Details	LastModified Time
04/09/2026	04/09/2026	Patient is here for a preop visit. Patient is scheduled for ACDF at C4-5 and C5-6 on 4/15/2026 at BUMCP.	mgreener1	Not available	04/09/2026 11:47:13

Allergies: Ampicillin, Metformin, Penicillin
Current Pain med: Naproxen prn (already stopped)
Clearance: completed anc cleared

Current anti-coagulant: None

Patient is on ozempic, last injection on 4/4 and holding

Pre-op Symptoms: progressive cervical myelopathy

I reviewed patients most recent x-ray and MRI and agree with above surgical plan. Patient was shown the nature of the surgery on their own imaging as well as computer generated models. We again reviewed the surgery details, including risks and benefits. We discussed potential complications including, not limited to, bleeding, infection, reaction to anesthesia, dysphagia, dysphonia, recurrent laryngeal nerve palsy, persistent pain and need for additional intervention. We reviewed postoperative instructions and restrictions, expectations, and discharge planning. Medications and allergies have been reviewed. We have reviewed the preoperative instruction sheet and I have instructed the patient to read the spine passport or have a care provider read through the spine passport prior to surgery and keep in an easily accessible location. Patient is aware no opiate medications will be provided beyond 6 weeks from surgical date, and it is recommended to take a stool softener while taking any pain medications.

Today patient is having progressive weakness in the bilateral upper and lower extremities. Given worsening symptoms I recommended that we move surgery to Saturday 4/11 at CISH. I discussed this with Dr. Chutkan and he is in agreement that we need to proceed with surgery sooner due to progressive myelopathy.

Patient has completed preoperative clearances which are scanned into chart. We have ensured the patient is medically fit for surgery by review of preop clearance records.

All questions have been answered to patient satisfaction and patient is clear to proceed with surgery at this time. Patient understand that they will be n.p.o at midnight prior to surgery. They will await phone call (day prior to surgery) with check in time.

I spent at least 60 minutes on today's encounter the patient between review of documentation, face to face time, as well as documentation after. This included discussion with Dr. Chutkan, surgical team and our surgery scheduler.
