Encounter

Encounter details	Dx: L2 wedge fracture due to a GLF Prec: goes by "Katie", fall risk, stroke in 12/25, not able to move RUE due to stroke, R AFO

Subjective

Subjective	Pt greeted supine in bed and agreeable to PT with no reports of pain/dizziness at the start of session.

Quality Indicator: Roll left and right

Roll left and right

Roll left and right details	Helper provided the following assistance to roll: Assistance with LESS than or exactly half of all rolling tasks, including: Rolling to right from back, Rolling to left from back
Roll left and right device(s)	No device
Comments	Patient is independent rolling R, min assist rolling L secondary to residual weakness/hemiparesis R side from CVA 12-2025.
Roll left and right: Current Status	Partial/moderate assistance - 3
Roll left and right: Goal	Independent - 6

Quality Indicator: Sit to lying

Sit to lying

Sit to lying details	Helper provided the following assistance to move from sitting to lying: Verbal cues, Contact guard assistance
Sit to lying device(s)	No device
Comments	Patient is CGA for BTB for upper/lower quarter, VC/TC for R UE/LE, hemi-technique due to residual weakness from CVA UE>LE.
Sit to lying: Current Status	Touching assistance - 4
Sit to lying: Goal	Independent - 6

Quality Indicator: Lying to sitting on side of bed

Lying to sitting on side of bed

Lying to sitting on side of bed details	Helper provided the following assistance to move from lying to sitting: Setting up device(s), Verbal cues, Contact guard assistance
Lying to sitting on side of bed device(s)	Bed rails
Comments	Patient has an adjustable bed at home, CGA OOB L side with flat bed.
Lying to sitting on side of bed: Current Status	Touching assistance - 4

Physical Therapy Daily Progress Note

Lying to sitting on side of bed: Goal	Independent - 6

Quality Indicator: Sit to stand

Sit to stand

Sit to stand details	Helper provided the following assistance to move from sit to stand: Assistance with LESS than or exactly half of all sit to stand tasks, including: Trunk support, RLE support
Sit to stand location	Wheelchair, Side of bed, Chair
Sit to stand device(s)	HW
Comments	Patient is min assist for trunk support slight LOB with standing for transfers from variety of surfaces using HW, cues for R LE foot/alignment/positioning, weight-shifting, hand placement on WC and correct placement of HW.
Sit to stand: Current Status	Partial/moderate assistance - 3
Sit to stand: Goal	Touching assistance - 4

Quality Indicator:Chair/bed-to-chair transfer

Chair/bed-to-chair transfer

Chair/bed-to-chair transfer details	Helper provided the following assistance to transfer to and from a bed to chair (or wheelchair): Assistance with LESS than or exactly half of all transfer tasks, including: Trunk support
Chair/bed-to-chair transfer device(s)	HW
Comments	Patient is min assist for SPT from variety of surfaces using HW, cues for R LE foot/alignment/positioning, weight-shifting, hand placement on WC and correct placement of HW, pivoting, turning, BOS.
Chair/bed-to-chair transfer: Current Status	Partial/moderate assistance - 3
Chair/bed-to-chair transfer: Goal	Touching assistance - 4

Quality Indicator: Car transfer

Car transfer

Car transfer details	Helper provided the following assistance to transfer in and out of car or van: Setting up device(s), Verbal cues, Assistance with LESS than or exactly half of all transfer tasks, including: Trunk support, Pivoting, lifting R LE
Car transfer device(s)	leg lifter / HW
Comments	Patient is min assist for car transfers using HW, cues for R LE foot/alignment/positioning, weight-shifting, hand placement on WC and correct placement of HW, pivoting, turning, BOS.
Car transfer: Current Status	Partial/moderate assistance - 3
Car transfer: Goal	Touching assistance - 4

Quality Indicator: Walk 10 feet

Walk 10 feet

Walk 10 feet details	Helper provided the following assistance for patient to walk 10 feet: Setting up device(s), Verbal cues, Contact guard assistance
Walk 10 feet device(s)	HW
Comments	Patient is able to ambulate x 10 feet level surfaces using HW with CGA, VC/TC for BOS, sequencing, HW placement, performs step 2 patterning.
Walk 10 feet: Current Status	Touching assistance - 4

Physical Therapy Daily Progress Note

Walk 10 feet: Goal	Partial/moderate assistance - 3

Quality Indicator: Walk 50 feet with two turns

Walk 50 feet

Walk 50 feet details	Helper provided the following assistance for patient to walk 50 feet: Setting up device(s), Verbal cues, Contact guard assistance
Walk 50 feet device(s)	HW
Comments	Patient is able to ambulate x 50 feet level surfaces using HW with CGA, VC/TC for BOS, sequencing, HW placement, performs step 2 patterning. Patient able to make multiple turns with CGA.
Walk 50 feet: Current Status	Touching assistance - 4
Walk 50 feet: Goal	Partial/moderate assistance - 3

Quality Indicator: Walk 150 feet

Walk 150 feet

Walk 150 feet details	Helper provided the following assistance for patient to walk 150 feet: Setting up device(s), Verbal cues, Assistance with LESS than or exactly half of all walking tasks, including: Trunk support
Walk 150 feet device(s)	HW
Comments	Patient is able to ambulate x 150 feet level surfaces using HW with Min A, VC/TC for BOS, sequencing, HW placement, performs step 2 patterning. Patient able to make multiple turns with Min A. Patient unsteady with increased distance due to LE fatigue R>L.
Walk 150 feet: Current Status	Partial/moderate assistance - 3
Walk 150 feet: Goal	Partial/moderate assistance - 3

Quality Indicator: Walking 10 feet on uneven surfaces

Walk 10 feet on uneven surfaces

Walk 10 feet on uneven surfaces details	Helper provided the following assistance for patient to walk 10 feet on uneven surfaces: Setting up device(s), Verbal cues, Assistance with LESS than or exactly half of all walking tasks, including: Trunk support
Walk 10 feet on uneven surfaces device(s)	HW
Comments	Patient is able to ambulate x 10 feet unlevel surfaces/tumble mat using HW VC/TC for BOS, sequencing, HW placement, performs step 2 patterning. Patient requires min assist for trunk/LE support due to LE weakness R>L on uneven surfaces.
Walk 10 feet on uneven surfaces: Current Status	Partial/moderate assistance - 3
Walk 10 feet on uneven surfaces: Goal	Partial/moderate assistance - 3

Quality Indicator: Picking up object

Picking up object

Picking up object details	Helper provided the following assistance for patient to pick up object off floor: Assistance with LESS than or exactly half of all picking up object tasks, including: Transition from stand to bend/stoop, Trunk support
Picking up object device(s)	HW / Reacher
Comments	Patient requires min assist for trunk steadying to transition between HW <> reacher for P/U object using reacher. Patient requires min assist for P/U object using reacher for steadying when transitioning from HW and reacher.

Physical Therapy Daily Progress Note

Picking up object: Current Status	Partial/moderate assistance - 3
Picking up object: Goal	Partial/moderate assistance - 3

Quality Indicator: 1 step (curb)

1 step (curb)

1 step/curb details	Helper provided the following assistance for patient to go up and down 1 step/curb: Setting up device(s), Verbal cues, Assistance with LESS than or exactly half of all step/curb tasks, including: Trunk support
1 step/curb device(s)	HW
Comments	Patient able to go up/down curb step using HW with min assist for trunk/LE support, sequencing of HW on/off step, technique with LE on/off curb.
1 step/curb: Current Status	Partial/moderate assistance - 3
1 step/curb: Goal	Partial/moderate assistance - 3

Quality Indicator: 4 steps

4 steps

4 steps details	Helper provided the following assistance for patient to go up and down 4 steps: Assistance with LESS than or exactly half of all step tasks, including: Trunk support
4 steps device(s)	One HR
Comments	Patient able to go up/down 4 stairs with one HR with min assist, assist for R LE/placement/step length descending due to motor planning/control deficits from recent CVA.
4 steps: Current Status	Partial/moderate assistance - 3
4 steps: Goal	Partial/moderate assistance - 3

Quality Indicator: 12 steps

12 steps

12 steps details	Patient did not go up and down 12 steps, Attempted however patient is unable to go up and down 12 steps 6 stairs
12 steps device(s)	One HR
Comments	Patient able to go up/down 6 stairs with one HR with min assist, assist for R LE/placement/step length descending due to motor planning/control deficits from recent CVA. Patient limited to 6 stairs secondary to LE fatigu R>L.
12 steps: Current Status	Not attempted due to medical condition or safety concerns - 88
12 steps: Goal	Partial/moderate assistance - 3

Quality Indicator: Wheelchair

Does the patient use a wheelchair and/or scooter?	No

Assessment/Plan

Patient's response to treatment	Assessed Weekly QIs with CGA/Min A d/t instability despite using HW for stability on all mobility tasks. Pt reports increased fatigue post gait able to amb 150ft today.
Progress towards goals	Progressing
Communication with other disciplines	PT
Details of interdisciplinary communication	Supervision by Tess Hofstra PT, DPT and Pt appropriate for PTA to provide treatment.

Physical Therapy Daily Progress Note

Impairment limiting functional status	Decreased endurance, Decreased strength, Impaired balance, Pain, Right hemiplegia/hemiparesis
Plan	POC modified to best fit patient's current needs. Continue bed mobility, transfers and gait

Electronically signed and verified by:

Daryl Sangco, PTA 04/06/2026 12:50 (US)

Comments

Treatment performed under CDC/facility guidelines for infection control. Pt ID confirmed by 2 identifiers prior to session. Care transferred to nursing staff. Pt remains sitting up in WC, seat alarm in place, call light/telephone in reach, and bedside table in front of pt. Pt reports this writer meets all their needs. (Daryl Sangco, PTA; 04/06/2026; 12:50; US)

Occupational Therapy Daily Progress Note

Treatment date/time/type

Treatment date	04/06/2026
Treatment 1 time	13:30 13:50
Total therapy minutes	20
Individual therapy minutes	20
Concurrent therapy minutes	0
Group therapy minutes	0
Co-treatment therapy minutes	0
Total missed therapy minutes	40
Treatment incomplete details	Pt declined to engage in further therapeutic interventions stating: "I'm too depressed to do anything, I just don't want to be here anymore." CM and therapy manager notified.

Subjective

Subjective	Upon arrival, pt found side-lying in bed w/ HOB raised. Pt not agreeable to engage in therapeutic interventions and stated: "I'm too depressed to do anything, I just don't want to be here anymore." Pt also stated: "I walked around a lot with (PT) today, I don't need to do anymore."

Pain assessment/management

Pain assessment/management 1

Date/time assessed	04/06/2026
Pain observations/comments	Pt had no c/o pain throughout tx session.

Quality Indicator: Oral hygiene

Oral Hygiene

Oral hygiene details	Patient did not complete oral hygiene, Patient refused to complete oral hygiene Therapist attempted, but pt declined.
Oral hygiene: Current Status	Patient refused - 7

Quality Indicator: Shower/bathe self

Shower/bathe self

Shower/bathe self details	Patient did not complete shower/bathing, Patient refused to complete shower/bathing Therapist attempted, but pt declined.
Shower/bathe self: Current Status	Patient refused - 7

Quality Indicator: Upper body dressing

Upper body dressing

Upper body dressing details	Patient did not complete upper body dressing/undressing, Patient refused to dress/undress upper body Therapist attempted, but pt declined.
Upper body dressing: Current Status	Patient refused - 7

Quality Indicator: Lower body dressing

Lower body dressing

Lower body dressing details	Patient did not complete lower body dressing/undressing, Patient refused to dress/undress lower body Therapist attempted, but pt

Occupational Therapy Daily Progress Note

	declined.
Lower body dressing: Current Status	Patient refused - 7

Quality Indicator: Putting on/taking off footwear

Putting on/taking off footwear	
Putting on/taking off footwear details	Patient did not put on/take off footwear, Patient refused to put on/take off footwear Therapist attempted, but pt declined.
Putting on/taking off footwear: Current Status	Patient refused - 7

Quality Indicator: Toileting hygiene

Toileting hygiene	
Toileting hygiene details	Patient did not complete toileting hygiene, Patient refused to complete toilet hygiene Therapist attempted, but pt declined.
Toileting hygiene: Current Status	Patient refused - 7

Quality Indicator: Toilet transfer

Toilet transfer	
Toilet transfer details	Patient did not transfer on and off toilet or commode, Patient refused to transfer on and off toilet or commode Therapist attempted, but pt declined.
Toilet transfer: Current Status	Patient refused - 7

Education

Education provided in patient's preferred language	English
Education provided	
Benefits of therapy	
Method of education	Verbal instruction
Education provided to	Patient
Response of patient or caregiver	Needs reinforcement, continued education, or both
Education plan	Therapist used good therapeutic use of self and empathetic listening as pt voiced concerns of overall depression. Therapist provided max. education and encouragement to attempt to engage in functional ADL tasks and leisure activities to improve pts participation in functional tasks necessary to maximize independence and improve overall QOL; however, pt declined all attempted interventions despite therapists max. encouragement and education on benefits and importance of participating.

Assessment/Plan

Patient's response to treatment	Pt not agreeable to engage in therapeutic interventions; therefore, tx session ended early on this date. Therapist will attempt further therapeutic interventions next tx session. Attempted tx session took place in pts room. Pt left in comfortable position side-lying in bed w/ HOB raised, w/ all needs met and call light and tray table in reach.
Communication with other disciplines	Case management
Details of interdisciplinary communication	Pt perseverating on d/c plans throughout attempted tx session and therapist collaborated w/ CM. CM stated would follow up w/ pt.
Plan	Continue OT POC.
