REFERRING PHYSICIAN: M Z. Jasser MD
ADMITTING PHYSICIAN: DO John Yu DO

CHIEF COMPLAINT: Fall, right hip pain.

HISTORY OF PRESENT ILLNESS: A 79-year-old male. He was seen at the rehab. Patient had recent left hammertoe surgery on the left foot with podiatry. Patient was told to be non-weight bearing primarily on the left foot. However, he was using a knee scooter and was using the toilet. He sat down and then when trying to get up and not put weight on his left foot, the patient fell onto his right hip. Patient suffered a right proximal femur fracture. Patient was admitted to HonorHealth Deer Valley. He underwent right hip intramedullary nailing by Dr. Wong on 03/08. Patient's creatinine was a little bit elevated. He was found to have some urinary retention. Patient does have history of prior prostate procedure. Workup showed that he had an intraluminal bladder mass, likely arising from the prostate gland on CT on 03/24. He was seen by urology. They had difficulty passing a catheter. Patient had some retention but then was able to urinate. Creatinine improved to 1.1. Patient was recommended outpatient cysto and follow-up. Patient had some postoperative anemia, did require a unit of blood postoperatively. Patient also had some electrolyte imbalances, hypokalemia, hypomagnesemia that was repleted. He had a couple episodes of hyperglycemia, A1c of 5.4 and his blood sugar did stabilize. He was recommended outpatient follow with bone and health clinic for his osteoporotic type fractures.

PAST MEDICAL HISTORY: BPH, history of prior procedure on his prostate, history of sciatica.

ALLERGIES: No known drug allergies.

History and Physical

MEDICATIONS: On admission include: Tylenol, aspirin 81 mg b.i.d. for DVT prophylaxis, calcium carbonate, cholecalciferol, docusate, lidocaine patch, methocarbamol, oxycodone, and Flomax.

SOCIAL HISTORY: The patient is a nonsmoker, denies tobacco, heavy alcohol, or illicit drug use. Patient is a Vietnam veteran, lives with his family.

FAMILY HISTORY: Noncontributory to the current presentation.

REVIEW OF SYSTEMS: A 12-point systems reviewed and negative except as detailed in HPI.

PHYSICAL EXAMINATION:
VITAL SIGNS: Blood pressure 130/74, pulse 83, respirations 18, temperature 98.4.
GENERAL: This is a well-nourished, well-developed male, in no acute distress.
HEENT: Pupils equal, round, reactive to light and accommodation. Extraocular movements intact. Mucous membranes are pink and moist.
NECK: Supple, no JVD or thyromegaly.
HEART: Normal S1, S2, no murmurs, rubs, or gallops.
LUNGS: Clear to auscultation bilaterally.
ABDOMEN: Soft, nontender, with no visceromegaly.
EXTREMITIES: No clubbing, cyanosis, or edema. Patient has a dressing, surgical dressing over the right anterior hip. Patient is also wearing a camtype boot on the left foot and ankle.

ASSESSMENT AND PLAN:
1. Right femur fracture, status post ORIF. Patient will continue on aspirin b.i.d. for DVT prophylaxis. Patient is on oxycodone, Tylenol for pain control, also on metaxalone as needed. PM\T\R has been consulted. PT/OT will continue to work with patient.
2. Postoperative anemia. We will follow hemoglobin.
3. Patient with enlarged prostate, had some urinary retention. Foley not able to be replaced. Creatinine was stable, 1-1.1 range. He has some enlargement of the prostate, possible extending into the bladder on a CT. Patient will need outpatient urology follow-up.
4. Patient found to have an incidental small left pleural effusion. No need outpatient monitoring of this. No signs of respiratory compromise. Patient will remain on aspirin b.i.d. for DVT prophylaxis.
5. Patient had a recent left foot hammertoe surgery. Patient with podiatry. Patient is to be non-weight bearing on the left foot to allow for healing.
6. Patient had some BPH and urinary retention. He is on Flomax. We will monitor urine output.
7. Patient is full code.

HOME HEALTH CERTIFICATION and FACE to FACE ENCOUNTER ADDENDUM

A FACE TO FACE ENCOUNTER indicating the reason(s) this patient requires home health services was performed on DATE: 03/18/2026
Diagnoses and Clinical condition(s) contributing to the need for Home Health Care (specify): R hip fracture, fall, L foot surgery

The patient is confined to the home for the following reason(s):
[x] Unable to ambulate
[] Unable to ambulate > ___ feet without rest periods
[x] Requires assistive device: wheelchair, walker and/or assistance of another person to leave home
[] Requires the use of special transportation
[] Confusion/Cognitive limitations make it unsafe for patient to leave home
[x] Pain interferes with outside mobility
[] SOB with exertion/activity, requires rest periods
[] Medically restricted to home (reason if not specified above): []

Prescriptive needs:
[x] Medication Management
[x] Pain assessment and management
[x] Disease Process Education
[x] Gait Training
[x] ADL training
[x] Fall Risk/Balance Assessment and training

Home Health Referral

[x] Strength/ Range of motion training
[] Speech training
[] Cognitive retraining
[] Dysphagia training
[x] Safety Assessment and training
[x] Wound Care: [foot, hip]
[] other: []

HOME HEALTH REFERRAL AND ORDERS:

Discipline-specific frequency and duration of service recommendations may be further specified by the physician responsible for the home care plan of care.

[x] Skilled Nursing for: [x] med mgmt. [x] teaching and training [x] Wound care [] Other:
[x] Occupational Therapy for: [x] ADLs/IADLs [x] therapeutic ex. / activity [] Other:
[x] Physical Therapy for: [x] gait/balance [x] therapeutic ex. / activity [] Other:
[] Speech Therapy for: [] Dysphagia [] Cog [] Speech / Language [] Other:
[] Home Health Aide for:
[] bathing / personal care as indicated by the comprehensive assessment with input from the interdisciplinary team and community physician.
[] Social Worker 1-2 visits for:
[] assessment, education and/or action on community resources, and counseling as indicated

This patient is currently under my care, and I have initiated the establishment of a plan of care for home health services following the face-to-face encounter on the date noted above. I certify that this patient is confined to his home and needs intermittent skilled services (nursing care, physical therapy and/or speech therapy or continues to need occupational therapy) as indicated in the above summary of impaired body structures that supports the homebound status and need for skilled care. This patient will be followed by his primary care provider who will be responsible for further review of the plan of care and recertification as applicable.
