* Patient Reported

Exam:

Upper Extremity

Right upper extremity exam notable for the following:
Active forward flexion to 90 degrees. Crepitus with range of motion. 4 out of 5 rotator cuff strength testing. Positive Hawkins, Neer, and empty can test. Distally neurovascularly intact. No swelling or erythema.

Impression/Plan:
1. **Shoulder Arthritis, Right**
   Primary osteoarthritis, right shoulder (M19.011)
   located on the right shoulder.

   Plan: Additional Notes.
   Patient Specific Notes: Ed presents today for preoperative visit. He is scheduled for a right reverse total shoulder on April 7th at Southern Hills Hospital. All questions regarding surgery were answered. He was provided with a sling and post operative pain medication. We will use his regular anti-coagulants for post op DVT prophylaxis. He will follow up 2 weeks after his procedure.

   Plan: Counseling - Preoperative Instructions.
   Please refer to the education handout for detailed counseling.

   Plan: Brace - Shoulder.
   Diagnosis: Shoulder Arthritis, Right
   The right shoulder was braced with a ultrasling, Shoulder orthosis, abduction.
   I recommend continued use of the orthosis until next follow up.
