Home Health Face to Face Documentation

Date of F2F Encounter with Patient: 2/21/2025

Diagnosis related to Home Health Care: M48.56XA, G40.909, R53.81, I69.354, R53.1

Summary of Impaired Body Structures/Functions that Support Homebound Status and Need for Skilled Care

Impaired Structures:
- ☐ brain, spinal cord, or related
- ☐ cardiovascular system
- ☐ respiratory system
- ☐ urinary system or pelvic floor
- ☐ head and neck region
- ☐ eyes, ears, nose, mouth or throat
- ☐ upper extremity or shoulder
- ☐ lower extremity
- ☐ trunk
- ☐ structures related to movement
- ☑ skin
- ☐ other:

Impaired functions:
- ☐ orientation, memory, attention
- ☐ emotional functions
- ☐ seeing
- ☐ hearing
- ☐ sensory, touch, proprioceptive
- ☐ pain
- ☐ heart functions
- ☐ respiratory functions
- ☐ exercise / activity tolerance
- ☐ urination / defecation
- ☑ mobility or stability of joints
- ☑ muscle tone or power
- ☑ gait function
- ☐ other:

Resultant Activity Limitations:
- ☐ carrying out daily routine
- ☐ acquiring skills (learning)
- ☐ communication (expressive)
- ☐ communication (receptive)
- ☐ speaking
- ☐ changing / maintaining body position
- ☐ transferring oneself
- ☐ hand and arm use
- ☑ self-care and washing oneself
- ☑ toileting
- ☐ dressing
- ☐ eating or drinking
- ☑ IADLs
- ☐ other:

☑ Patient is medically restricted to the home due to: recent Hospitalization
☐ Patient requires assistance and/or the following assistive device(s): 4wwy w/c,

This patient is currently under my care, and I have initiated the establishment of a plan of care for home health services following the face-to-face encounter on the date noted above. I certify that this patient is confined to his/her home and needs intermittent skilled services (nursing care, physical therapy and/or speech therapy or continues to need occupational therapy) as indicated in the above summary of impaired body structures that supports the homebound status and need for skilled care. This patient will be followed by Saylor Baubista APRN *who will be responsible for further review the plan of care and recertification as applicable.*

History and Physical Rehab

PATIENT:KLEINER, BEVERLY G.
DOB:07/03/1942
MEDICAL RECORD #:000117117
ACCOUNT NUMBER:500753618

DATE OF ADMISSION:02/15/2025
DATE OF SERVICE:02/16/2025
REFERRING PHYSICIAN:Jayson L. Bautista APRN
ADMITTING PHYSICIAN:MD Minh H. Nguyen MD

HISTORY OF PRESENT ILLNESS: This is an 82-year-old female with history of stroke who presents with bilateral lower extremity weakness and gait disturbance. The patient also reportedly had acute emesis and diarrhea. The patient's previous CVA with right-sided deficits as well as chronic low back pain. The patient was seen by her home health and felt that she had declined and recommended acute rehab.

PAST MEDICAL HISTORY: Significant for previous CVA with residual _____ sided deficits, hypertension, and hypothyroidism.

SOCIAL HEALTH HISTORY: Nonsmoker, nonalcoholic drinker.

ALLERGIES: No known drug allergies.

MEDICATIONS: Aspirin 81 mg daily, atorvastatin 10 mg daily, Lovenox 40 mg subcutaneously daily, gabapentin 600 mg daily, Keppra 250 mg daily, levothyroxine 88 mcg daily, pantoprazole 40 mg daily, and sertraline 50 mg daily.

REVIEW OF SYSTEMS: A 12-point system review was performed, otherwise negative except noted on physical exam.

PHYSICAL EXAM:
VITAL SIGNS: Temperature 98.3, heart rate 72, respirations 18, and BP 132/61.
HEENT: Normocephalic and atraumatic. Pupils equal and reactive. Oropharynx without injection.

Encompass Health Rehabilitation Hospital of Henderson
Patient: KLEINER, BEVERLY G
MRN: 117117
FIN#: 500753618
DOB/Age/Gender: 7/3/1942 82 years Female

Admit Date: 2/15/2025
Discharge Date:
Attending Phys: Nguyen MD,Minh H

History and Physical

NECK: Negative JVD or carotid bruits.
LUNGS: Clear to auscultation. Negative rales, wheezes or rhonchi.
HEART: Regular rhythm.
ABDOMEN: Obese, soft, and nontender. Negative hepatosplenomegaly.
EXTREMITIES: Positive pedal pulses.
NEUROMUSCULAR EXAMINATION: Cranial nerves II-XII are grossly intact with no focal deficits. Manual muscle testing of the upper extremities are 5/5 and lower extremity 3-4/5.

ASSESSMENT:
1. Generalized weakness/debility.
2. Bilateral lower extremity weakness with status post ground level fall on 02/01.
3. Previous CVA in 2015 with some residual weakness.
4. Hypertension.
5. Impaired mobility.
6. Impaired ADLs.

DISCUSSIONS AND PLANS:
The patient has impairment in bed mobility, transfers, unsteady gait and balance, easy fatigability and poor endurance and pain and overall loss of functional independence. Because of above medical problems and functional issues, it is my opinion the patient should be in acute rehab unit rather than a lower level of setting of care. Therefore, she will need multidisciplinary approach, three hours a day of therapy for five days a week, close medical supervision for 24 hours, and 24-hour rehab nursing care.

There are no clinical significant differences between the patient's current status and information described in a preadmission screening document.

There are NO safety or special Considerations that would likely preclude immediate implementation of an intensive rehabilitation program (3 hours per day, 5 days a week) or substantially influenced the plan of care

Considering all the information above, it is my best judgment that this patient requires intensive rehabilitation therapy as described above in an inpatient hospital environment due to complexity of nursing, medical management and rehabilitation needs. Furthermore, this patient can reasonably be expected to participate in and benefit from an inpatient stay with an interdisciplinary team approach to the delivery of rehabilitation care under the direction and supervision of a rehabilitation physician.

Other treatment plans:
1. Impairment with ambulation and mobility: Continue physical therapy.
2. Impairment of activities of daily living: Continue occupational therapy.
3. Gait and balance training.
4. Internal Medicine consultation.
5. Check laboratory data on a regular basis.
6. Will treat the patient as the clinical course unfolds.

History and Physical

7. Continue with present medication regimen.

REHABILITATION GOALS: Rehabilitation goals are to maximize patient's independence with ADLs, self care, mobility, communication skills and patient's medical status. Specific goals are to be established following completion of the assessment period. Goals include:
1. The patient is to be at a modified independent level with ambulation and mobility, and also with activities of daily living.
2. The patient is to be medically stable.

REHABILITATION POTENTIAL/PROGNOSIS: Good, per the above stated goals.

DISPOSITION: Home.

ESTIMATED LENGTH OF STAY: 10 - 15 days

Lee PT, DPT, Wee Jin Jed - 02/20/2025 15:53 PST

Assessment
Treatment Summary/Progress : Pt tolerated tx well today. Ther act, and gait training completed per grid. Treatment emphasized on gait mechanics. Pt responded well to increasing her endurance, however still amb with antalgic gait pattern. Pt still has difficulty with L hip pain, heat pack was provided this session. Pt will cont to benefit from skilled PT intervention to improve functional mobility. Session ended with pt in bed, bed alarm activated, c/l and tray table within reach, and all needs met. RN notified of pt's return.
IP Patient Impairments/Limitations-PT : Balance deficits, Bed mobility deficits, Cognitive deficits, Impaired activity tolerance, Impaired gait, Impaired judgment/safety awareness, Impaired sensation, Pain limiting function, Strength deficits, Transfer deficits, Transition deficits, Wheelchair mobility deficits
