Documents for Discussion

Discussed the following documents:
- NP Thyroid 30 mg tablet - 01/19/26

Screening

None recorded.

HPI

Pt is a 89 year old female with PMH of HTN, hyperlipidemia, IBS, OAB, and hypothyroidism who presents for follow up. Medications were reviewed and reconciled. Taking as prescribed with no adverse reactions. Feeling well. She c/o fatigue, but is otherwise, doing well. No other complaints.

ROS

Patient reports **fatigue** but reports no fever, no chills, no night sweats, and no significant weight gain/loss. She reports **constipation** but reports no abdominal pain, no nausea, no vomiting, no heartburn, no bloating, and no difficulty swallowing. She reports **increased frequency, leaking urine, and incontinence** but reports no pain during urination, no urgency, no blood in urine, and no flank pain. She reports **dizziness** but reports no vertigo, no loss of consciousness, no memory loss, no numbness, no tingling, no headaches, and no seizures; **aphasia**. She reports **anxiety** but reports no depression and no sleep disturbance. She reports no eye irritation and no vision change. She reports no chest pain and no rapid or irregular heartbeat. She reports no shortness of breath, no wheezing, and no cough. She reports no vaginal lesions, no vaginal discharge, no vaginal itching or burning, and no vaginal odor. She reports menopause. She reports no muscle aches, no muscle cramps, no muscle weakness, no joint pains, and no back pain. She reports no rash, no skin ulcers, no abnormal moles, and no nail discoloration. She reports no breast lumps, no breast pain, and no nipple discharge. She reports no heat/cold intolerance, no increased thirst, no abnormal hair loss/growth, and no change in libido. She reports no swollen glands, no bruising, and no bleeding disorder.

Physical Exam

Constitutional: General Appearance: well-nourished and well-developed. Level of Distress: NAD. Ambulation: ambulating normally.

Head: Head: normocephalic and atraumatic.

Eyes: Lids and Conjunctivae: no discharge or pallor and non-injected. Pupils: PERRLA. EOM: EOMI. Sclerae: non-icteric. Vision: peripheral vision grossly intact and acuity grossly intact.

Ear, Nose, Mouth, and Throat: Ears: no lesions on external ear and normal hearing. Nose: no lesions on external nose or nasal discharge. Mouth: no lip lesions/ulcers.

Neck: Neck: supple, trachea midline, and no masses. Thyroid: no enlargement.

Repiratory: Effort: no dyspnea. Auscultation: clear to auscultation.

Cardiovascular: Neck Vessels: no carotid bruits. Pulses: normal throughout. Extremities: no cyanosis, edema, varicosities, or palpable cord.

Gastrointestinal: Bowel Sounds: normal bowel sounds. Inspection and Palpation: no masses, tenderness (no guarding, no rebound), or CVA tenderness and soft and non-distended. Liver: non-tender and no hepatomegaly. Spleen: non-tender and no splenomegaly. Hernia: none palpable.

Musculoskeletal:: Musculoskeletal: no contractures, tenderness, or bony abnormalities and normal range of motion.

Back: Back: normal curvature.

Neurologic: Gait and Station: **shuffling**. Cranial Nerves: grossly intact. Motor Strength and Tone: normal strength and tone. Sensation: grossly intact. Reflexes: normal DTRs throughout. Coordination and Cerebellum: no tremor.

Skin: Inspection and palpation: no rash, lacerations, scars, lesions, ulcers, induration, nodules, or jaundice and good turgor. Nails: normal.

Lymphatic: Cervical: no enlargement or tenderness. Supraclavicular: no enlargement or tenderness. Inguinal: no enlargement or tenderness.

Psychiatric: Insight: good judgement. Mental Status: normal mood and affect and active and alert. Orientation: to time, place, and person. Memory: recent memory normal and remote memory normal.

Assessment / Plan

Agrees to medical student.

1. Aphasia -
Worsening. Recent blood work within normal limits. Neurological exam negative. Updated MRI 3/4/2025 demonstrates chronic small vessel ischemic changes. S/P SLP. Followed by neurology. DAT Scan negative.
R47.01: Aphasia

2. CVD (cerebrovascular disease)
As above. However, the hyperintense T2 change in periventricular and subcortical bilateral white matter changes noted on MRI may also be a result of migraine headaches. Neurology to address. ASA 81 mg daily.
I67.9: Cerebrovascular disease, unspecified

3. PSP (progressive supranuclear palsy)
P-tau217 positive. However, neurology is more concerned for PSP as the diagnosis. On WAVi, her physical reaction time is slow. Peak frequency is slow in all areas. Her P300 is slow as well. Findings most c/w a neurodegenerative condition, such as Parkinson's disease or PSP.
G23.1: Progressive supranuclear ophthalmoplegia [Steele-Richardson-Olszewski]

4. Autonomic dysfunction
Stable. Suspect autonomic dysfunction. CARTs confirms. Followed by cardiology.
G90.9: Disorder of the autonomic nervous system, unspecified

5. Small fiber neuropathy
Stable. Followed by neurology. MetanX.
G62.9: Polyneuropathy, unspecified

6. Vertigo
Stable. May be central, but has history of BPPV. Have referred to PT for balance therapy.
R42: Dizziness and giddiness

7. Rectal prolapse
Stable. Continue fiber supplementation and adequate hydration. Followed by gastroenterology.
K62.3: Rectal prolapse

8. Diverticular disease of colon -
Stable. Advised fiber supplementation and hydration. Followed by gastroenterology.
K57.30: Diverticulosis of large intestine without perforation or abscess without bleeding

9. Irritable bowel syndrome -
Stable. Advised fiber supplementation and hydration.
K58.9: Irritable bowel syndrome, unspecified

10. Gastroesophageal reflux disease -
Stable. Monitor.

K21.9: Gastro-esophageal reflux disease without esophagitis

11. Hypertensive renal disease -
Stable. Losartan 25 mg 1.5 tablet PO Q day. Continue Metoprolol ER 25 mg 1.5 tablet Q Day. Followed by cardiology. RPM.
I12.9: Hypertensive chronic kidney disease with stage 1 through stage 4 chronic kidney disease, or unspecified chronic kidney disease

12. Labile hypertension due to being in a clinical environment -
Stable. Continue to monitor home blood pressure log.
I15.8: Other secondary hypertension

13. Chronic kidney disease stage 3 -
Improving. Now G1A2. Moderate risk of progression. Complicated by HTN. Microalbumin negative. Jardiance.
N18.31: Chronic kidney disease, stage 3a
- UA, MICROSCOPIC, REFLEX TO CULTURE
- COMPREHENSIVE METABOLIC PANEL + E-GFR
- CBC W/AUTO DIFF WITH PLATELETS
- INTACT PTH
- IONIZED CALCIUM, MEAS
- PHOSPHORUS
- MAGNESIUM, RBC
- VITAMIN D, 25 OH

14. Hyperparathyroidism due to renal insufficiency -
Stable. Monitor.
N25.81: Secondary hyperparathyroidism of renal origin

15. Mitral valve prolapse -
Stable. Followed by cardiology.
I34.1: Nonrheumatic mitral (valve) prolapse

16. Cardiac arrhythmia -
Stable. Followed by cardiology.
I49.8: Other specified cardiac arrhythmias

17. Mixed hyperlipidemia -
Stable. Crestor. Fish Oil.
E78.2: Mixed hyperlipidemia
- LIPID PANEL WITH REFLEX DIRECT LDL

18. Hypothyroidism -
Stable. Nature Thyroid.
E03.9: Hypothyroidism, unspecified
- FREE T3
- REVERSE T3
- TSH + FREE T4 PROFILE

19. Seasonal allergy -
Stable. Xyzal and Flonase OTC as needed. Nasal saline irrigation. Followed allergy/immunology.
J30.2: Other seasonal allergic rhinitis

20. Osteoporosis -
Stable. DEXA 4/16/2024. Vitamin D. Prolia.
M81.0: Age-related osteoporosis without current pathological fracture
- DEXA BONE DENSITY AXIAL SKELETON

21. Overactive urinary bladder -
Stable. Myrbetriq.
N32.81: Overactive bladder

22. Generalized anxiety disorder -
Suboptimal. GAD 7 score 5 suggesting mild symptoms. No longer Paxil ER. Ativan prn. Lexapro discontinued. Paxil. May also supplement with Natural Calm as needed. Followed by neuropsychiatry.
F41.1: Generalized anxiety disorder

23. Scoliosis deformity of spine -
Stable. Followed by orthopedic surgery.
M41.9: Scoliosis, unspecified

24. Ex-smoker -
Stable. 4 PYH.
Z87.891: Personal history of nicotine dependence

25. Body mass index (BMI) of 19.0 to 19.9 in adult
19.4
Z68.1: Body mass index [BMI] 19.9 or less, adult

Discussion Notes
Total visit time 34 minutes, in which the time was spent preparing the patients' chart for the encounter, reconciling medications, conducting interview and examination, reviewing consults/lab/imaging results, formulating a treatment plan, addressing patient concerns, coordinating care, and completing necessary documentation. RTC in 3 months.

Return to Office
- David M Francyk, DO for OFFICE VISIT 20 at OFFICE on 03/11/2026 at 01:20 PM
