Admission Date/Time: 12/28/2025 12:05 PM
Discharge Date/Time: 1/4/2026
Hospital Attending: Luke Carlos Fornari, MD
Primary Care Physician: No primary care provider on file.

Consulting Physician: Rovinsky, David, MD

Code Status: Full code - Chest compressions / Intubate / Full Treatment

Final Principal Diagnosis:

Diagnosis POA
Humerus head fracture, left, closed, initial encounter Yes
Pathologic fracture due to osteoporosis.

12/28

Hospital course:
Patient had a mechanical fall suffering a left shoulder fracture. She is traveling alone and was having difficulty doing her ADL's independently. She had pain control (doesn't like narcotics) and will go home with follow up with an orthopedic physician.
She was baseline otherwise with no infection.
Arrangements were made for her to have a traveling nurse to assist her back to the mainland with an orthopedic evaluation as soon as possible and to a STR facility.

Patients Allergies: Patient has no known allergies.

The patient was seen and examined on the day of discharge
Blood pressure 136/80, pulse 80, temperature 97.5 °F (36.4 °C), temperature source Temporal, resp. rate 18, height 1.727 m (5' 8"), weight 107.5 kg (236 lb 15.9 oz), SpO2 95%.

Discharge Medications:

Medication List

START taking these medications

acetaminophen 500 MG tablet
Commonly known as: TYLENOL
Take 1-2 tabs by mouth every 6 hours as needed for PAIN.

ibuprofen 600 MG tablet
Commonly known as: MOTRIN
Take 1 tab by mouth four times per day as needed for PAIN.

lidocaine 5 % patch

Commonly known as: lidocaine
Apply 1 Patch topically once per day as needed for PAIN. May cut to size to cover most painful areas and apply for 12 out of 24 hours.

ondansetron ODT 4 MG disintegrating tablet
Commonly known as: ZOFRAN ODT
Take 1 tab by mouth every 4 hours as needed for NAUSEA.

oxyCODONE ir 5 MG immediate release tablet
Commonly known as: ROXICODONE
Take 1 tab by mouth every 4 hours as needed for up to 7 days.

CONTINUE taking these medications

AMLODIPINE BENZOATE PO
Take 10 mg by mouth one time per day.

hydroCHLOROthiazide 25 MG tablet
Commonly known as: ORETIC
Take 1 tab by mouth one time per day.

levothyroxine 150 MCG tablet
Commonly known as: LEVOTHROID/SYNTHROID
Take 1 tab by mouth Daily except Sun.

losartan 50 MG tablet
Commonly known as: COZAAR
Take 1 tab by mouth one time per day.

metoprolol succinate XL 25 MG XL tablet
Commonly known as: TOPROL XL
Take 1 tab by mouth one time per day.

pantoprazole 40 MG tablet
Commonly known as: PROTONIX
Take 1 tab by mouth one time per day. For stomach.

timolol 0.5 % ophthalmic solution
Commonly known as: BETIMOL
Place 1 drop into both eyes two times per day.

Where to Get Your Medications

These medications were sent to Kauai Professional Pharmacy (Lihue, HI) 3-3420B Kuhio Highway #101, Lihue HI 96766

Phone: 808-245-6306
ondansetron ODT 4 MG disintegrating tablet
oxyCODONE ir 5 MG immediate release tablet

You can get these medications from any pharmacy
Bring a paper prescription for each of these medications
acetaminophen 500 MG tablet
ibuprofen 600 MG tablet
lidocaine 5 % patch

Discharge Instructions
Regular Diet
Your doctor has recommended the following diet for you:

Regular diet - General balanced diet, no restrictions. Eat more often: whole grains, fruits vegetables, lean meats and dairy products. Eat less often: processed foods, animal fats, sugary foods. Visit www.choosemyplate.gov for additional information on healthy eating.

Diet Type Regular

Follow up with your Primary Care Provider
The patient is a Tourist and should follow up with Primary Care Physician at home as soon as possible.

Activity
Activity as tolerated

AVS EQUIPMENT ON DISCHARGE (DME)
Dispense one hemiwalker. Patient height 5'8", weight 236 lbs. Deliver to Wilcox Medical Center room 416. Discharge 1/4/26.

31 minutes were spent on the dismissal process.

Recent Labs: No results found for this or any previous visit (from the past 24 hours).
No results for input(s): "WBC", "HGB", "PLTC", "NA", "K", "CL", "CO2", "BUN", "CRE", "GLU" in the last 72 hours.]

Subjective:

CC: Ms. Odoni is a 76 year old female. She is here today following a transition of care from a skilled nursing facility (Ridgecrest Post Acute 1/5/26-1/12/26 then transfered to AHC Scottsdale for ongoing skilled PT/OT due to Left FX of Head of Humerus).

HPI: HOSPITAL ADMISSION 12/28/25-1/5/26

Diagnosis POA
Humerus head fracture, left, closed, initial encounter Yes
Pathologic fracture due to osteoporosis

12/28/25-1/4/26
Hospital course:

Pathologic fracture of the left proximal humerus due to osteoporosis Yes
Ms Odoni has underlying hypothyroidism, morbid obesity BMI 36, and HTN and is visiting Hawaii on a cruise ship. Suffered a mechanical fall resulting in an acute comminuted displaced fracture of the head and surgical head of the left humerus associated with fracture of the inferior glenoid rim. Sling in place Seen formally by orthopedics who recommends close follow-up and possible surgical intervention when she returns
back to Arizona Transfered directly to Ridgecrest Post acute on 1/4/26 from Hawaii and then transferred to AHC Scottdale on 1/12/26 for ongoing skilled care pending total shoulder reverse shoulder surgery at Core Institute
Humerus head fracture, left, closed Pathologic fracture of the left proximal humerus due to osteoporosis Yes
It is of moderate intensity.
weakness due to LF humerus neck fx
It is of moderate intensity.

The course has been stable and nonprogressive.

The patient's course has been stable and nonprogressive.

ROS:
CONSTITUTIONAL: Negative for chills, fatigue, fever and night sweats.
EYES: Negative for eye pain and photophobia.
E/N/T: Negative for nasal congestion and sore throat.
CARDIOVASCULAR: Negative for chest pain, dizziness and palpitations.
RESPIRATORY: Negative for recent cough, dyspnea and hemoptysis.
GASTROINTESTINAL: Negative for abdominal pain, acid reflux symptoms, abdominal bloating, dysphagia, constipation, diarrhea, heartburn, hematemesis, hematochezia, melena, nausea and vomiting.
GENITOURINARY: Negative for dysuria and hematuria.
MUSCULOSKELETAL: Positive for **arthralgias**. Negative for back pain, joint stiffness or (Left shoulder) myalgias.
INTEGUMENTARY/BREAST: Positive for **sugical incision CDI**. Negative for extremely dry skin, pruritis or rash.
NEUROLOGICAL: Positive for **weakness**. Negative for fainting.
HEMATOLOGIC/LYMPHATIC: Negative for easy bruising and excessive bleeding.
ENDOCRINE: Negative for polydipsia and polyphagia.

H40 Glaucoma
E03.9 Hypothyroidism, unspecified
K21.9 Gastro-esophageal reflux disease without esophagitis

Plan: labs 1/25/26 INR 1.0, A1c 5.4, glucose 118, BUN 12, Cr 0.5, Ca 9.7, Na 144, K 3.7, TSH 2.39

Unspecified displaced fracture of surgical neck of left humerus, subsequent encounter for fracture with routine healing.
On cruise in Hawaii, tripped and fell onboard on 12/28/25. Suffered Humerus head fracture, left, closed Pathologic fracture of the left proximal humerus due to osteoporosis.Inpatient hospital 12/28/25-1/4/26 and then flown from Hawaii to Ridgecrest Post acute on 1/4/26-1/12/26 and then to AHC Scottsdale for ongoing skilled care

Plan of care
PT/OT
Pain control; tylenol 500mg QHS and Q6H prn, oxy 5mg Q6 hr prn
Lidocaine patches to upper neck
FU NILOOFAR DEHGHAN,Orthopedic Surgery on 2/11/26 s/p Left Reverse Shoulder Arthroplasty on 1/26/26
FU Ortho 2/11/26-completed
Next FU Ortho 3/12/26

2/12/26 New orders from ortho
PLAN:
The sutures were removed during the visit. The patient no longer requires the sling but may use it for comfort or in crowded settings to protect the shoulder.
She is advised to avoid external rotation beyond neutral for six weeks following surgery. She is encouraged to move her shoulder as tolerated within the prescribed parameters and to move her wrist and elbow freely.
She may lift items equivalent to the weight of a coffee cup or plate of food with two hands. She is cleared to shower, allowing soap and water to run over the incision, and instructed to pat the area dry without rubbing.
The patient is informed that she can sleep in any position that is comfortable, with most patients preferring a recliner or wedge
pillow. She is advised to place a thin pillow between her torso and arm for additional support if sleeping on her back.
From an orthopedic standpoint, the patient is deemed safe to recover at home. However, the decision regarding discharge from the rehabilitation facility will be made collectively by the facility staff, considering her overall recovery and ability to manage activities of daily living. Follow-up with the surgeon is scheduled in approximately one month.

2/27/26 DC planning for next Thursday. Patient tolerating therapy. Increased ROM w/o pain +stiffness of Left shoulder

Weakness.
weakness due to Reverse Total Shoulder Arthroplasty on 1/26/26

Continue PT/OT
s/p Left Reverse Arthroplasty on 1/26/26
Shoulder precautions per Ortho MD FU 2/11/26 Next FU 3/12/26

Comments:

Precautions / Prior Living

Precautions Precautions / Contraindications: "Nadia" UPDATED 2/11: Shoulder ROM as tolerated except avoid ER beyond neutral for 6 weeks, cleared to shower, can lift a coffee cup or plate with two hands, sling for comfort PRN

Pt is a 76 y/o female hospitalized in Kaui on 12/28 after falling while on a cruise ship in Hawaii. Pt dx with L communted fx of humerus and also inferior glenoid rim. Pt placed in sling and to be NWB LUE. Pt also reports pain in L knee as "knee buckled" leading to the GLF. Imaging is negative for dislocation/fx. Pt reports f/u ortho sx consult on 1/15 for a reverse TSA.

Prior Medical PMHx: Glaucoma, hypothyroidism, HTN, interstitial lung disease.

Prior Living Prior Living Environment = Patient resided in private residence.

Prior Living Description: Pt lives alone in SLH with 3 STE, IND with ADLs and IADLs, IND with amb.

Prior Assistance Prior Cognitive Assistance = No supervision required

Prior Equipment Equipment Prior to Onset: none

Discharge Plan Transition/Discharge Plan = Patient to live alone in private residence.

Assessment and Summary of Skilled Services

Therapy Interventions Skilled Interventions Provided: Interventions of focus this reporting period that required the skills of a therapist included assessment of bed mobility, transfers, gait, L shoulder ROM.

Precautions / Prior Living

Precautions

Precautions / Contraindications: Updated 02-11-26: LUE NWB, ROM as tolerated with the exception to limit external rotation to neutral, 1-2 # weight limit, con't sling PRN comfort.

76 y/o female sustained mechanical fall on cruise ship in Hawaii (12-25-25) resulting in non-op L humeral head fracture, TSA pending, (+) L knee pain/buckling (no acute injuries)

Prior Medical

PMHx: glaucoma, hypothyroidism, HTN, interstitial lung disease, osteoporosis, arthritis

Prior Living

Prior Living Environment = Patient resided in private residence.

Prior Living Description: Lives alone SLH, 3 steps to enter at front, but typically enters from garage, regular bed, has 4WW but wasn't using it, has newly acquired hemiwalker, use of SPC on stairs (difficulty with curbs/steps) and in community otherwise wasn't using AD for mobility, WIS no grab bars, no chair, stationary shower head, doesn't wear socks, elevated toilets, uses pony wall next to toilet to assist with transfers, does not have a bidet, no family or caregivers available.

Prior Assistance

Prior Cognitive Assistance = No supervision required

Prior Equipment

Equipment Prior to Onset: Leftover 4WW

Discharge Plan

Transition/Discharge Plan = Patient to live at home w/support/(A) from others.

Assessment and Summary of Skilled Services

Skilled Interventions

Skilled Interventions Provided: ADLs, with attempts at training for transfers, toileting, upper/lower body dressing, G/H, shower/bathing, wc mobility and gait/ambulation. Attempts at ther-apt and ther-ex to increase overall strength, balance and endurance in prep for improved carryover with functional tasks

Patient Progress

Progress & Response to Tx: Patient is compliant with Plan Of Treatment and Patient is making consistent progress towards reaching ST and LT goals.

Supervision

OT/Asst. Supervision : Therapist participated in direct patient care during this reporting period.

Communication

Team Communication / Collaboration: Treatment results communicated to Interdisicplinary Team.

Justification for Continued Skilled Services

Impairments

Remaining Impairments: decreased static/dynamic balance, decreased functional capacity, pain and strength impairments

Continued Skill

Reason for Skilled Services: Patient requires skilled OT services to assess safety and independence with ADLs, assess safety and independence with self-care and functional tasks of choice, develop and instruct on exercise program, develop and instruct on adaptation techniques, develop and instruct on compensatory strategies, facilitate dynamic standing balance, facilitate independence with ADLs, improve motor control/tone in upper extremity, improve rehab potential, increase functional activity tolerance, increase independence with ADLs, increase safety awareness, maximize independence with ADLs, maximize rehab potential, provision of modalities and strengthening and provision of pain management techniques in order to enhance patient's quality of life by improving ability to be able to return to prior level of living.

Level of Skilled Services: The recommended level of skilled therapy services is required due to the following complexities and comorbidities that impact treatment: High level prior level of function, Pain severity level and Strong motivation to achieve prior level of function.

Rehab Potential

Potential for Achieving Rehab Goals: Patient demonstrates good rehab potential as evidenced by ability to follow multi-step directions, ability to self correct, motivated to participate, stable medical condition and increased functional activity tolerance.

Plan of Tx Focus

Focus of Plan of Treatment = Restoration,Compensation
